**Anyone can sell a generator. Anyone might not engineer its proper configuration including size, voltage, fuel, noise, and regulatory. All too often engineering drawings are incomplete or specific to a particular model leaving room for bid interpretation, costly over runs and delays in the project.**

**SBP Industries provides quality engineering based on years of experience designing backup power systems. Defining the correct system will save cost, time, and insure a successful project from start to startup.**

**We also offer complete turnkey solutions of engineering and sales.**

**Give us a call or bring us in for a site survey.**

**We have complete backup capabilities with over 3.5 acres of mobile generator, distribution, transformers, and cable. Our emergency service is second to none 365 days a year 24/7.**
